Who said **small**?

"Big canners all started with **S1**"

SEMIAUTOMÁTIC ROUND CAN SEAMER

S1 is a strongly build, simple construction and **totally manual operating**, table top, round can closing machine, handling the full range of sanitary sizes, with **can Ø diameters** from **50 to 218 mm** and **heights** between **20 and 300 mm**.

Powered by a 3-phase or single phase **1 HP motor**.

One seaming head with two seaming rolls (1st & 2nd operation) manually activated by a hand lever.

Its operating, its simplicity itself and the easy changing from one size to another (made possible by using unit seaming chucks & lifter plate already adjusted at factory) makes it particularly desirable machine for:

- * **Canneries**
- * **Home canning**
- * **Technical schools**
- * **Laboratories**
- * **Market tests, etc...**

Optional (under special order)
100% stainless steel finish

NEW SEAMING SYSTEM
HOMOGENEOUS SEAMS

Transport cost (freight) calculation:
Dimensions (machine inside wooden box): **1700x800x650 mm**
Weight: **150 Kg**
